

TAK til Happy Hand for 30.000 kr. fra kvindegrupper i Sierra Leone i 2021

Masanga i Sierra Leone modtog i august 2021 i alt 30.000 kr. fra Happy Hand.

Pengene er anvendt til undervisning af især enlige unge mødre samt unge piger, der er droppet ud af skolen, i fremstilling og salg af grøntsager på en effektiv måde.

Projektet har resulteret i grøntsagsproduktion både på friland og i drivhuse, og har øget sundheden samt indtægterne for 2000 husstande i Masanga-området, idet man er lykkedes med at sælge grøntsagerne både til restauranter og hoteller i området.

Dansk Børnefond kan hermed bekræfte, at Happy Hands støtte er anvendt til det givne formål i efteråret 2021.

Sierra Leone og Dansk Børnefond takker alle, der hjælper i Happy Hand.

Med venlig hilsen Dansk Børnefond – Pia Elkjær, formand – 20. marts 2022

SPECIAL PROJECT REPORT

Name of project: Masanga Women Vegetable Production Project

Location: Masanga Community, Kholifa Rowalla Chiefdom, Tonkolili District, Sierra Leone

Project description and progress: The masanga women vegetable production and Greenhouse Project is to restore and improve livelihood and house income of about two thousand (2000) households of Masanga community. This will be empowering women especially single parents, widows, aged, youths and children to establish farmers groups and grow vegetables year- round to generate income and improve family food. Through the greenhouse the vegetable growers/ farmers can be trained in the management of the greenhouses, how vegetables can be grown year-in and year out, how healthy vegetable seedlings can be raised inside the greenhouse to be transplanted both inside the greenhouse and in the open field, agronomic practices of assorted vegetable cultivation will also be part of the training package. There will be market linkages to the key consumers of their produce particularly Masanga hotel and some other hotels within the environs. Caterers and individual consumers can be targeted with the community. It is intended that this project will help boost household nutrition of the Masanga people.

Progress: The project was launched – procurement and construction of the two green houses has been completed, procurement of simple farm tools and purchase of assorted seedlings, training beneficiaries on greenhouse management and Agronomic practices on assorted vegetable has been completed. Next event, planting and establishing of vegetable seed Nursery (vegetable seedlings) nurturing, marketing linkages , transplanting and monitoring .

Did you encounter particular problems with the project? Community mobilization was a bit difficult, more demand for agricultural input, capacity building due to limited funds. We can do more training and expansion of acreages but funds are limited.

Who will benefit from the project and how will the local community benefit? The community is willing and the demand for vegetables is huge and beneficiaries were very active and participated in all project activities – Direct and indirect beneficiaries are Masanga community and its environs (Single parents, widows, aged youth, the girl mother child drop out of school, Restaurants, individual consumers, caterers, Hotels and Mining Companies)
